

ARCTIC[™] MATE

APPLICATIONS

Used to read and load program files into ARCTIC 59 / ICE 59 - 1/10 HP and 1/15 HP motors that are primarily used in commercial refrigeration walk-in coolers and freezers. Provides a Portable Device that allows our customers to easily access the programming functions of the ARCTIC 59/ ICE59 / 1/10 HP / 1/15 HP.

SPECIFICATIONS

Will program RPM and Rotation for the number of speeds available in our existing ARCTIC 59 / ICE 59 motors 1/10 and 1/15 HP versions (2 speeds) through the 8-pin Connector

Will program RPM and Rotation for the number of speeds available for our Re-Design ARCTIC 59 / ICE 59 motors 1/10 and 1/15 HP versions (4 speeds) through Mini USB Connector - available in September 2012

Capable of programming through the speed range in any combination of speeds (500 - 1800 RPM) and Rotations

Can be used for lab use during development testing and field use for installations / maintenance / change outs / and retrofits

Works on a 9V battery or 9VDC power supply, both provided in the kit
